

May 4, 1973

they are eliminated from having any convenience except to the status quo that now exists because their, the self interest and the selfish attitude of a lot of people that have no concern about the public interest at all, and I just think it is a horrible example to flip flop over night. In order to bring about a study, with the suggestion by Senator Goodrich, he is going to kill the bill in any case, if he can and I can understand why he is trying to kill it. I understand Senator Goodrich most of the time, better than he understands himself. So I think we shouldn't do that, if you could do it, why there's no way you can prevent it.

PRESIDENT: Well, I have lights on all over the place. Actually Senator Fred Carstens, now wait a minute, he is passing. Senator Murphys light is still on. Senator Murphy, I would recognize you. Actually you know the issue before the body is just to withdraw Senator Schmit's motion. I'm trying to find out if they are objections and if there are, why we'll have to take a vote, what what will we do here?

SENATOR CARPENTER: I object and get it to vote.

PRESIDENT: All right. Then the motion is still before us, and go ahead Senator Murphy.

SENATOR MURPHY: Well, I would reply to Senator Carpenter who the other day, stated his tremendous objections to one of the nations biggest evils. A one bank town. This is the same Senator who believes in a one man legislature however. The issue I think is proven very clearly what has been proposed here, a number of times. Senator Carpenter is going to protect the people, the only people whom we have heard from were the people who were directed to write by and I assure you, it was not the little banks. The correspondence you receive from the people, were from Omaha, which is not the home of little banks. Senator Goodrich is not offering to establish a status quo, on this thing in behalf of the little banks who like it like it is, because he made his proposal on behalf as he himself stated the other day, of the Omaha National Bank which happens to be without any doubt, the largest bank in this State. If we are truly to serve this issue which was brought to this body, not by the people, but by bankers, then certainly those peoples wishes, interests and expressions should be respected. I won't delay by this any further. I support Senator Goodrich.

PRESIDENT: All right, well, it is difficult to establish a speaking order here. I suppose that really we still have the Schmit motion before us. Senator Goodrich go ahead, and we'll come back and catch Senator Snyder then here in a moment. Go ahead.

SENATOR GOODRICH: Ok. Just for Senator Carpenter benefit, Senator Carpenter, you came in a little late apparently, because I didn't start the Donny Brookes this morning. Senator Schmit got up and moved that we withdraw the Goodrich amendment. That is what started this morning. The study that I referred to is not, a delaying tactic. If I had in mind a delaying tactic, I would not have suggested a kill motion that I was considering. I'm just trying to be honest with the body and what I was trying to do this morning was to refresh everybodys mind as to what the bill was and that is why I went through the entire bill. The, I'd like to reiterate though, that I didn't start the Donny Brooke this morning, Senator Schmit started it when he offered a motion to strike the Goodrich and all I was doing was responding to that.
